### □ Developments of GDP

The national economy experienced a marked slowdown during the year of 2015; affected by deepening of the political and social unrest in the region, particularly; in Syria and Iraq, that strongly influenced the performance of many economic sectors. The real GDP grew by 2.4 percent compared to 3.1 percent during 2014. When excluding “net taxes on products”, which grew by 1.2 percent, GDP at constant basic prices grew by 2.6 percent during 2015, compared to 3.2 percent during 2014.

At current market prices, GDP grew by 4.7 percent during 2015, compared to 6.6 percent during 2014. This decline in nominal growth is mainly attributed to the slowdown in the general price level, measured by the GDP deflator, which grew by 2.3 percent compared to 3.4 percent during 2014, as a reflection of the decline in oil prices in the international market since the last quarter of 2014 which contributed in reducing the production costs.

The main sectors contributed to the economic growth during the year of 2015 were; “finance and insurance services” (0.5 percentage point), “transports, storage and communications” (0.5 percentage point), “producers of government services” (0.3 percentage point) “mining and quarrying” (0.2 percentage point), and manufacturing (0.2 percentage point). These sectors collectively accounted for 70.8 percent of real GDP growth during 2015.

The economic sectors displayed a wide variation in their performance during the year of 2015. Some sectors recorded accelerated growth, such as “electricity and water”, “finance and insurance services”, and “transport, storage and communications”. In contrast, “restaurant and hotels”, and construction, experienced a contraction. On the other hand, “producers of government services” and “domestic services of households” sectors maintained their performance.

## Prices

The general price level, measured by the percentage change in the Consumer Price Index (CPI), continued its contraction by 1.2 percent during the first four months of 2016, against a contraction of 1.0 percent during the same period of 2015. This came as a result of the continuous falling in the prices of oil and related goods and services in the global markets and its impact on domestic prices. The main groups and items that witnessed decline in their prices are “fuels and lighting” (-8.2 percent), “meat and poultry” (-7.6 percent), and transportation (-6.3 percent). They collectively contributed in reducing the overall inflation rate by (-1.9) percentage points.
