Circular to electronic payment and money transfer companies and banks operating in the Kingdom that provide electronic acquiring services through points of sale (POS)

Subject: Linking providers of electronic acquiring services through points of sale (POS) on the instant payment system (CliQ)

After greetings,

Within the framework of the Central Bank of Jordan's continuous endeavor to develop the electronic payment system in the Jordanian market in a way that enhances the achievement of compatibility and integration between all parties, and out of its keenness to motivate banks and electronic payment service companies to keep pace with the latest developments in financial technology and encourage the use of all available payment instruments and channels within a safe and low-risk environment, in a manner that enhances financial inclusion and ensures the provision of easy, safe and reliable electronic payment methods.

We emphasize the necessity of connecting to the instant payment system (CliQ), managed by the Jordanian Payment and Clearing Company (JOPACC), as providers of electronic payment acquiring services through points of sale (POS) at merchants, and activating the payment service by scanning the quick response code (QR) at the points of sale, no later than 1/31/2024, with an emphasis on the necessity of continuous coordination and cooperation with all participating parties.

Respectfully,,

Governor

Dr. Adel Al Sharkas
